

# AtmosAir™

*The Global Solution for Healthy Air.*

AtmosAir is **proven air purification technology that acts as a continuous disinfectant**, actively reducing airborne and surface contaminants since 2004.

## How it Works:

Ions are released into the air to neutralize contaminants.

The ions contact viruses and mold, breaking them down.

The result is a significantly safer space for people to gather.

## Clean Indoor Air is Essential

We spend 90% of our time indoors, and Indoor Air Quality (IAQ) is one of the top five health threats in the United States.

### A Safe, & Environmentally-Friendly Process

AtmosAir's patented technology uses no chemicals, heavy metals or mercury, and produces no harmful byproducts in the treated space.

### Reduced Virus & Bacteria

Bi-Polar Ions actively neutralize viruses, bacteria, and molds offering protection from illness and disease.

### Continuous Disinfection

AtmosAir™ offers the only solution on the market that continuously disinfects; reduces particulates, VOCs and other harmful contaminants.
